### رسالة الوحدة:

تسعى وحدة الأمتياز بكلية طب الأسنان- جامعة بنى سويف الى تطوير المعارف والتواصل والمهارات الأكاديمية لأطباء الامتياز من خلال التدريب الإكلينيكي المكثف في جميع التخصصات و تحفيز البحث العلمى وتقديم خدمة علاجية متطورة تلبي متطلبات المجتمع فى إطار قيم أخلاقية.

### Internship Unit Vision:

To empower dental interns to clinically apply and improve their knowledge with distinguished research to create practitioners that are highly competent in all dental practices for serving the Egyptian and regional communities.

### Internship Unit Mission:

The mission of the internship unit is to improve the dental interns' knowledge, communication, and clinical skills through extensive clinical training in all specialties, distinguished scientific research, and providing improved treatment services that fulfill community needs based on ethical principles.

### Goals and Objectives of Internship Program:

**The first goal:** Preparing qualified graduates capable of scientific thinking, innovation, self-learning and teamwork.

- Paying attention to clinical applications in the various fields of oral and dental medicine in order to raise the professional competence of graduates to qualify them to compete in the labor market locally and regionally.
- Participation of the internship student in the scientific days at the college to be able of continuous learning.

**The second goal:** Developing the self-learning and continuing education system by applying modern technologies.

- Organizing conferences, symposia and workshops to raise the level of education for internship doctors.

**The third goal:** Spreading health services through a program that interacts with the community.

- Achieving effective community partnership with the local community.
- Creating a distinct plan for community participation between the college and the surrounding community.
- Dissemination of health services through a program that interacts with the community.
